

# Pollinator Habitat

## OUTREACH PROGRAM

### WHAT IS THE POLLINATOR HABITAT OUTREACH PROGRAM?

Pheasants Forever & Quail Forever's Pollinator Habitat Outreach Program (PHOP) aims to engage schools, youth groups, families and communities across the country in establishing pollinator habitat projects. The objective of this program is to increase

awareness about decreasing pollinator habitat across the country.

Program support includes training on how to plan and conduct a pollinator project from start to finish, conservation curriculum for classrooms, hands-on educational activities, and monitoring resources that can be conducted after the project is established.

### GRANT OPPORTUNITIES

Grants up to \$500 are available to help with project expenses. The results of this program will not only benefit pollinators by providing quality foraging and nesting habitat, but it'll provide opportunities for people to get outside and gain an appreciation for wildlife and conservation.
