

Youth Pollinator Habitat Program Sign Order Form

Pollinator Habitat Project

Native wildflowers provide valuable habitat for pollinating insects, grassland songbirds, pheasants and quail.

Pollinators impact 75% of the global food supply, are keystone indicators of environmental health and their populations are in decline.

To learn more about pollinators, contact Pheasants Forever at:
www.pheasantsforever.org

This sign order form is specific to Youth Pollinator Habitat Projects. Your chapter has the ability to customize a Youth Pollinator Project sign specific to your local project (example sign at left). The signs are aluminum and they 16" x 20" in size. The signs are designed to be screwed to a wood post or bolted to a metal u-post. Signs should be ordered at least 4 weeks prior to your project date. The cost of your custom Youth Pollinator Habitat Project sign will be \$30 (plus shipping).

Number of signs you would like to order:
