

# Habitat Kit

## CONSERVATION CLAYS

### WHAT IS THE CONSERVATION CLAYS KIT?

- This Kit contains biodegradable stickers, seed, seed measuring device, colored chalk, and instructions on how to create conservation clays targets to promote pollinator habitat and the importance of shooting sports
- Chapters can purchase these kits at a cost of \$50 (includes

shipping cost and contains enough stickers, seeds and chalk to create 90 conservation clay targets).

- Note: Kits DO NOT include clay targets. Chapters are responsible for purchasing their own clay targets. Chapters are highly encouraged to use biodegradable clay targets when creating your conservation clays.

### USES FOR THE CLAYS:

- Create a fun event with a shooting team to raise awareness around the various ways shooting sports helps support conservation (guns & ammo help pay for conservation)
- Create a raffle by numbering the clays and selling them as raffle tickets at the annual banquet
- Create a hands-on educational activity at your next outreach event by having participants design their own conservation clays
- Create a fun shooting event in conjunction with the establishment of your chapter's next habitat project by shooting conservation clays over your project

To order brochures, complete the attached order form or contact Anna Swerczek at [aswerczek@pheasantsforever.org](mailto:aswerczek@pheasantsforever.org).

# Conservation Clays

## KIT ORDER FORM

Chapter Name: \_\_\_\_\_ Chapter #: \_\_\_\_\_

Phone: \_\_\_\_\_ Email: \_\_\_\_\_
